# CABINET DOOR STYLES

**Wall Cabinet Door**

**Base Cabinet Door**

## **Charlton Model: CT**

- Finish: Coffee Color
- 1/2" Thick Grade Plywood Box Construction
- Raised Center Panel Door
- Full Extension Soft-Closing Under-Mount Glide System
- European Style Fully Concealed Soft-Closing Hinges
- Five Piece Solid Wood Door and Drawer Face
- 3/4" Adjustable Shelves
- Clear Coated Natural Maple Finish Interior
- Full Overlay Doors and Drawers

**Wall Cabinet Door**

**Base Cabinet Door**

## **Perla Model: PE**

- Finish: Cream White Color
- 1/2" Thick Grade Plywood Box Construction
- Raised Center Panel Door
- Full Extension Soft-Closing Under-Mount Glide System
- European Style Fully Concealed Soft-Closing Hinges
- Five Piece Door and Drawer Face
- Solid Birch Frame with MDF Center
- 3/4" Adjustable Shelves
- Clear Coated Natural Maple Finish Interior
- Full Overlay Doors and Drawers

# CABINET DOOR STYLES

**Wall Cabinet Door**

**Base Cabinet Door**

## **Newport** Model: NT

- Finish: Cinnamon Color
- 1/2" Thick Grade Plywood Box Construction
- Raised Center Panel Door
- Full Extension Soft-Closing Under-Mount Glide System
- European Style Fully Concealed Soft-Closing Hinges
- Five Piece Solid Wood Door and Drawer Face
- 3/4" Adjustable Shelves
- Clear Coated Natural Maple Finish Interior
- Full Overlay Doors and Drawers

**Wall Cabinet Door**

**Base Cabinet Door**

## **Avalon** Model: AL

- Finish: Off White Color
- 1/2" Thick Grade Plywood Box Construction
- Raised Center Panel Door
- Full Extension Soft-Closing Under-Mount Glide System
- European Style Fully Concealed Soft-Closing Hinges
- Five Piece Door and Drawer Face
- Solid Birch Frame with MDF Center
- 3/4" Adjustable Shelves
- Clear Coated Natural Maple Finish Interior
- Full Overlay Doors and Drawers

# CABINET DOOR STYLES

**Wall Cabinet Door**

**Base Cabinet Door**

## **Sterling** Model: SG

- Finish: Gray Color
- 1/2" Thick Grade Plywood Box Construction
- Reversed Raised Center Panel Door
- Full Extension Soft-Closing Under-Mount Glide System
- European Style Fully Concealed Soft-Closing Hinges
- Five Piece Door and Drawer Face
- Solid Birch Frame with MDF Center
- 3/4" Adjustable Shelves
- Clear Coated Natural Maple Finish Interior
- Full Overlay Doors and Drawers

**Wall Cabinet Door**

**Base Cabinet Door**

## **Soda** Model: SO

- Finish: White Color
- 1/2" Thick Grade Plywood Box Construction
- Reversed Raised Center Panel Door
- Full Extension Soft-Closing Under-Mount Glide System
- European Style Fully Concealed Soft-Closing Hinges
- Five Piece Door and Drawer Face
- Solid Birch Frame with MDF Center
- 3/4" Adjustable Shelves
- Clear Coated Natural Maple Finish Interior
- Full Overlay Doors and Drawers

# CABINET DOOR STYLES

**Wall Cabinet Door**

**Base Cabinet Door**

## **Ebony Shaker** Model: ES

- Finish: Espresso Color
- 1/2" Thick Grade Plywood Box Construction
- Reversed Raised Center Panel Door
- Full Extension Soft-Closing Under-Mount Glide System
- European Style Fully Concealed Soft-Closing Hinges
- Five Piece Solid Wood Door and Drawer Face
- 3/4" Adjustable Shelves
- Clear Coated Natural Maple Finish Interior
- Full Overlay Doors and Drawers

**Wall Cabinet Door**

**Base Cabinet Door**

## **Dove White Shaker** Model: DS

- Finish: Dove White Color
- 1/2" Thick Grade Plywood Box Construction
- Reversed Raised Center Panel Door
- Full Extension Soft-Closing Under-Mount Glide System
- European Style Fully Concealed Soft-Closing Hinges
- Five Piece Door and Drawer Face
- Solid Birch Frame with MDF Center
- 3/4" Adjustable Shelves
- Clear Coated Natural Maple Finish Interior
- Full Overlay Doors and Drawers

# CABINET DOOR STYLES

**Wall Cabinet Door**

**Base Cabinet Door**

## **Smoky Gray Model: SM**

- Finish: Stained Gray Color
- 1/2" Thick Grade Plywood Box Construction
- Reversed Raised Center Panel Door
- Full Extension Soft-Closing Under-Mount Glide System
- European Style Fully Concealed Soft-Closing Hinges
- Five Piece Solid Wood Door and Drawer Face
- 3/4" Adjustable Shelves
- Clear Coated Natural Maple Finish Interior
- Full Overlay Doors and Drawers

**Wall Cabinet Door**

**Base Cabinet Door**

## **Aria Blue Model: AB**

- Finish: Blue Color
- 1/2" Thick Grade Plywood Box Construction
- Reversed Raised Center Panel Door
- Full Extension Soft-Closing Under-Mount Glide System
- European Style Fully Concealed Soft-Closing Hinges
- Five Piece Door and Drawer Face
- Solid Birch Frame with MDF Center
- 3/4" Adjustable Shelves
- Clear Coated Natural Maple Finish Interior
- Full Overlay Doors and Drawers

# CABINET DOOR STYLES

**Wall Cabinet Door**

**Base Cabinet Door**

## **Weston Shaker** Model: WS

- Finish: Bright White Color
- 1/2" Thick Grade Plywood Box Construction
- HDF Center Panel Door
- 3/4" Extension Soft-Closing Under-Mount Glide System
- European Style Fully Concealed Soft-Closing Hinges
- Five Piece HDF Door and Drawer Face
- 3/4" Adjustable Shelves
- Natural Maple Finish Interior
- Full Overlay Doors and Drawers

**Wall Cabinet Door**

**Base Cabinet Door**

## **Toffee Shaker** Model: TS

- Finish: Toffee Stain Color
- 1/2" Thick Grade Plywood Box Construction
- Solid Birch Door Frame with Veneered MDF Reversed Raised Center Panel Door
- Full Extension Soft-Closing Under-Mount Glide System
- European Style Fully Concealed Soft-Closing Hinges
- Five Piece Door and Drawer Face
- 3/4" Adjustable Shelves
- Clear Coated Natural Maple Finish Interior
- Full Overlay Doors and Drawers

# CABINET DOOR STYLES

**Wall Cabinet Door**

**Base Cabinet Door**

## **Cream White Shaker** Model: CS

- Finish: Cream White Color
- 1/2" Thick Grade Plywood Box Construction
- HDF Center Panel Door
- Full Extension Soft-Closing Under-Mount Glide System
- European Style Fully Concealed Soft-Closing Hinges
- Five Piece HDF Door and Drawer Face
- 3/4" Adjustable Shelves
- Natural Maple Finish Interior
- Full Overlay Doors and Drawers

- ⑦ Metal Brackets Reinforcements for Base Cabinets
- ⑧ Double Doweled Face Frame Joint
- ⑨ 3/4" x 1 1/2" Hardwood Face Frame
- ⑩ Door Bumper

# WOOD SPECIES AND CHARACTERISTICS

**ALDER**

**CHERRY**

**HICKORY**

**MAPLE**

**OAK**

When you choose your new kitchen or bath cabinetry, please keep in mind that no two pieces of wood are exactly the same. Stains are likely to exaggerate the difference between open and closed grains and other markings in wood. Grain variation and color change should be expected. As hardwood ages, it will darken when exposed to different types of light. Color differences or changes in wood can also be caused by exposure to harsh chemicals, extreme heat or moisture. Additionally, wood species exhibit other defining characteristics, such as mineral deposits/streaks, knots, sap runs, pin holes and wormholes. These markings make the wood unique and contribute to its enduring beauty.

**Alder** has a straight fine textured grain similar to Cherry and Maple. Although classified as a hardwood, it is moderately light in weight and considerably softer than other species. Therefore, care must be taken as it will dent and mar easily. Alder may exhibit grain and color variations, sapwood can be distinguishable from the heartwood, tight pin knots are sometimes present.

**Cherry** is characterized by its red undertones, but may vary in color from white to a deep, rich brown. Cherry is a close-grained wood with fairly uniform texture, revealing pin knots and curly graining. All wood will age with time and the finish will darken. This is especially true for Cherry. This is a sought-after quality in Cherry cabinetry, and those who select it expect this evolution.

**Hickory** is a strong, heavy hardwood known for distinctive graining patterns. Contributing to its dramatic appearance is a wide variation in color and streaking, ranging from white to dark brown. This contrast in color can appear in a single door panel. Hickory also contains random knots and wormholes that further contribute to a varied appearance. These exaggerated characteristics are to be expected and are considered desirable in Hickory cabinetry.

**Maple** is a close-grained hardwood that is predominately white to creamy-white in color, with occasional reddish-brown tones. While Maple typically features uniform graining as compared to other wood species, characteristic markings may include fine brown lines, wavy or curly graining, bird pecks and mineral streaks. These traits are natural and serve to enhance Maple's natural beauty.

**Oak** is a strong, open-grained hardwood that ranges in color from white to pink and reddish tones. Streaks of green, yellow and even black may appear due to mineral deposits. Oak may also contain wormholes and wild, varying grain patterns. This distinct graining is considered a desirable quality.

# OUR PROCESS TO CREATE A FINE FURNITURE FINISH

## **1. Wood Selection**

The first step to select the finest wood for the component parts to ensure that they meet our high standards. High quality raw materials are the basis for a fine furniture finished product.

## **2. Sanded to Perfection**

All the doors are sanded to assure that all parts of the wood will take the finish uniformly and evenly assuring consistent color.

## **3. Cleaning**

Each part is cleaned of dust and debris prior to entering the stain booth on a wood surface that is free of dust particles.

## **4. Staining/Painting**

The penetrating stain or paint is hand applied utilizing processes to make sure that the color is uniformly distributed.

## **5. Color Inspection**

The stained or painted product goes through a color inspection station to assure that all parts of the kitchen will be uniform in color.

## **6. Drying**

The product is then oven dried to ensure all parts are fully dry prior to sealing.

## **7. Sealer Coat**

The seal coat provides a base for the top coat by filling in any open pores in the wood, allowing the top coat to go on uniformly and evenly.

## **8. Drying**

The seal coat is oven cured for uniform hardness and drying. This prevents finish problems like crackling and peeling.

## **9. Hand Sanded**

The parts are lightly touch sanded with a fine grit sandpaper to prevent any raised grain or roughness. This allows for a more uniform build up in the top coat.

## **10. Dust Removal**

After sanding the parts are cleaned of any debris. This ensures no dust is in the top coat.

## **11. Top Coat**

A premium quality catalyzed clear top-coat is applied to protect the wood from environmental elements.

## **12. Drying**

The top coat is oven cured. This chemically locks in the properties of the top coat finalizing the finish quality.

## **13. Final Inspection**

All product goes through a final inspection in the finish area assuring consistent color and finish quality.

## **Additional Finish Steps for Glazed Product**

- 1.** After the seal sanding and cleaning the glaze is hand applied.
- 2.** The glazed product is placed on a rack to air dry.
- 3.** The product then goes through the top coat, drying and inspection steps.

- 1. Door/Entry:** A doorway should be at least 32 inches wide.
- 2. Door Interference:** No entry door should interfere with appliances, nor should appliance doors interfere with one another.
- 3. Distance Between Work Centers:** In a kitchen with three work centers\*, the sum of the distances between them should total no more than 26 feet. No leg of the work triangle should measure less than 4 feet nor more than 9 feet. When the kitchen includes additional work centers, each additional distance should measure no less than 4 feet nor more than 9 feet. No work triangle leg should intersect an island or peninsula by more than 12 inches.  
  
\* The distances between the three primary work centers (cooking, cleanup/prep and refrigeration) form a **work triangle**.
- 4. Separating Work Centers:** A full-height, full-depth, tall obstacle [i.e., a pantry cabinet or refrigerator] should not separate two primary work centers.
- 5. Work Triangle Traffic:** No major traffic patterns should cross through the work triangle.
- 6. Work Aisle:** The width of a work aisle should be at least 42 inches for one cook and at least 48 inches for multiple cooks.
- 7. Walkway:** The width of a walkway should be at least 36 inches.
- 8. Traffic Clearance at Seating:** In a seating area where no traffic passes behind a seated diner, allow 32 inches of clearance from the counter/table edge to any wall or other obstruction behind the seating area. If traffic passes behind the seated diner, allow at least 36 inches to edge past or at least 44 inches to walk past.
- 9. Seating Clearance:** Kitchen seating areas should incorporate at least the following clearances: At 30-inch-high tables/counters, allow a 24-inch-wide by 18-inch-deep knee space for each seated diner. At 36-inch-high counters, allow a 24-inch-wide by 15-inch-deep knee space. At 42-inch-high counters, allow a 24-inch-wide by 12-inch-deep knee space.
- 10. Cleanup/Prep Sink Placement:** If a kitchen has only one sink, locate it adjacent to or across from the cooking surface and refrigerator.
- 11. Cleanup/Prep Sink Landing Area:** Include at least a 24-inch-wide landing area to one side of the sink and at least an 18-inch-wide landing area on the other side.
- 12. Preparation/Work Area:** Include a section of continuous countertop at least 36 inches wide and 24 inches deep immediately next to a sink.
- 13. Dishwasher Placement:** Locate nearest edge of the primary dishwasher within 36 inches of the nearest edge of a sink. Provide at least 21 inches of standing space between the edge of the dishwasher and countertop frontage, appliances and/or cabinets placed at a right angle to the dishwasher.
- 14. Waste Receptacles:** Include at least two waste receptacles. Locate one near the sink(s) and a second for recycling in the kitchen or nearby.
- 15. Auxiliary Sink:** At least 3 inches of countertop frontage should be provided on one side of the auxiliary sink and 18 inches on the other side.

**16. Refrigerator Landing Area:** Include at least 15 inches of landing area on the handle side of the refrigerator or 15 inches of landing area on either side of a side-by-side refrigerator or 15 inches of landing area no more than 48 inches across from the front of the refrigerator or 15 inches of landing area above or adjacent to any undercounter refrigeration appliance.

**17. Cooking Surface Landing Area:** Include a minimum of 12 inches of landing area on one side of a cooking surface and 15 inches on the other side. In an island or peninsula, the countertop should also be extended a minimum of 9 inches behind the cooking surface.

**18. Cooking Surface Clearance:** Allow 24 inches of clearance between the cooking surface and a protected noncombustible surface [e.g., a range hood] above it. At least 30 inches of clearance is required between the cooking surface and an unprotected/combustible surface [e.g., cabinetry] above it. If a microwave hood is used, then the manufacturer's specifications should be followed.

**19. Cooking Surface Ventilation:** Provide a correctly sized, ducted ventilation system for all cooking surface appliances; the recommended minimum is 150 CFM.

**20. Cooking Surface Safety:** Do not locate the cooking surface under an operable window. Window treatments above the cooking surface should not use flammable materials. A fire extinguisher should be located near the exit of the kitchen away from cooking equipment.

**21. Microwave Oven Placement:** The ideal location for the bottom of the microwave is 3 inches below the principle user's shoulder but no more than 54 inches above the floor. If the microwave is below the countertop the bottom must be at least 15 inches off the finished floor.

**22. Microwave Landing Area:** Provide at least a 15-inch landing area above, below or adjacent to the handle side of a microwave.

**23. Oven Landing Area:** Include at least a 15-inch landing area next to or above the oven. At least a 15-inch landing area not more than 48 inches across from the oven is acceptable if the appliance does not open into a walkway.

**24. Combining Landing Areas:** If two landing areas are adjacent, determine a new minimum by taking the longer of the two landing area requirements and adding 12 inches.

**25. Countertop Space:** A total of 158 inches of countertop frontage, 24 inches deep, with at least 15 inches of clearance above, is needed to accommodate all uses.

**26. Countertop Edges:** Specify clipped or round corners rather than sharp edges.

**27. Storage:** The total shelf/drawer frontage is: 1,400 inches for a small kitchen (150 square feet or less); 1,700 inches for a medium kitchen (151 to 350 square feet); and 2,000 inches for a large kitchen (351 square feet or more). **\*See Chart.**

**28. Storage at Cleanup/Prep Sink:** Of the total recommended shelf/drawer frontage, the following should be located within 72 inches of the centerline of the main cleanup/prep sink: at least 400 inches for a small kitchen; at least 480 inches for a medium kitchen; and at least 560 inches for a large kitchen.

**29. Corner Cabinet Storage:** At least one corner cabinet should include a functional storage device. This does not apply if there are no corner cabinets.

**30. Electrical Receptacles:** GFCI (ground fault circuit interrupter) protection is required on all receptacles servicing countertop surfaces.

**31. Lighting:** Every work surface should be well-illuminated by appropriate task lighting.

	Small	Medium	Large
Wall	300 in.	360 in.	360 in.
Base	520 in.	615 in.	660 in.
Drawer	360 in.	400 in.	525 in.
Pantry	180 in.	230 in.	310 in.
Misc.	40 in.	95 in.	145 in.

**\*See line 27** - The recommended distribution for the shelf/drawer frontage is:

# CABINET SPECIFICATIONS: WALL CABINET DIMENSIONS

## STANDARD CABINET SPECIFICATIONS: WALL CABINET DIMENSIONS

These illustrations specify dimensions of horizontal rails, cabinet heights and standard interior opening heights for Wall cabinets. **Wall Top Hinge and Butt door cabinets do not have a center stile.**

## STANDARD CABINET SPECIFICATIONS: OVERLAY DIMENSIONS

### Full Overlay

Doors are sized to cover nearly all of the cabinet face frame. Full Overlay door styles require decorative hardware. **To facilitate proper door operation, include at least a 1" filler between the hinged side of Full Overlay door styles and deeper adjacent objects including cabinets, walls, appliances and countertops.**

Note: **A**

NT, CT & PE = 0"

ES, DS & SG = 1/4"

# CABINET SPECIFICATIONS: CABINET DIMENSIONS

## STANDARD CABINET SPECIFICATIONS: BASE & VANITY CABINET DIMENSIONS

These illustrations specify dimensions of horizontal rails, inset toe kick, cabinet heights and standard interior opening heights for Base & Vanity cabinets. Butt door cabinets do not have a center stile.

## STANDARD CABINET SPECIFICATIONS: TALL CABINET DIMENSIONS

\*Actual height of oven opening shown. Single oven cabinet is also designed to be used as a double oven cabinet by taking out first two drawers on the top to enlarge opening to accommodate double oven.

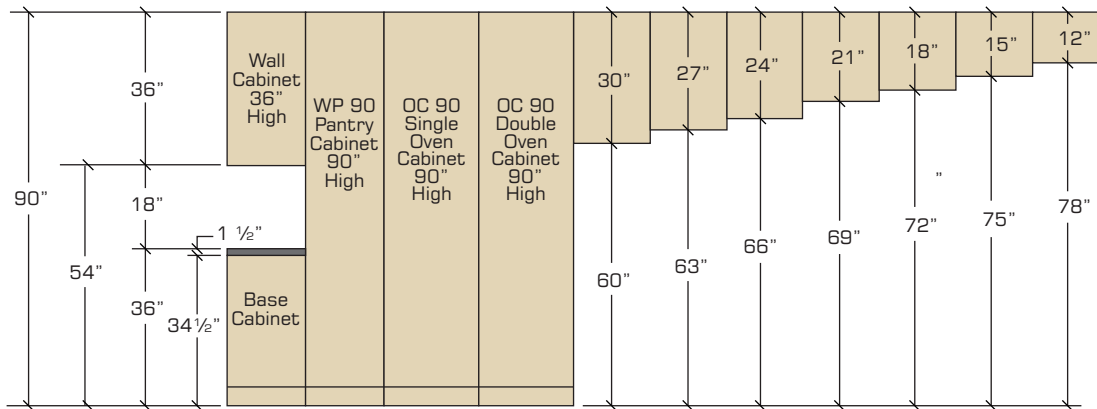

# CABINET SPECIFICATIONS: INSTALLATION GUIDELINES

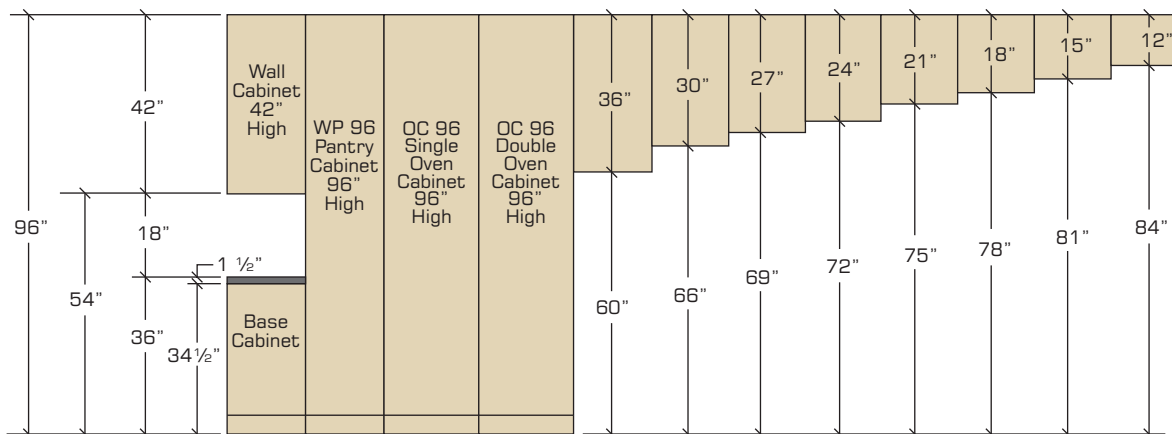

## 84" Top Alignment Cabinet Installation

- 84" top alignment cabinet installation includes standard Wall cabinets (30" high) installed 54" above the finished floor, allowing 18" clearance between the Wall cabinets and a standard countertop height of 36".
- Tall cabinetry (Linen, Pantry, Oven) is 84" high.
- When selecting cabinetry for installation above or near any appliance, refer to the appliance manufacturer's specifications for clearance and venting requirements.

## 90" Top Alignment Cabinet Installation

- 90" top alignment cabinet installation includes taller Wall cabinets (36" high) installed 54" above the finished floor, allowing 18" clearance between the Wall cabinets and a standard countertop height of 36".
- Tall cabinetry (Pantry, Oven) is 90" high.
- When selecting cabinetry for installation above or near any appliance, refer to the appliance manufacturer's specifications for clearance and venting requirements.

## 96" Top Alignment Cabinet Installation

- 96" top alignment cabinet installation includes full-height Wall cabinets (42" high) installed 54" above the finished floor, allowing 18" clearance between the Wall cabinets and a standard countertop height of 36".
- Tall cabinetry (Pantry, Oven) is 96" high.
- When selecting cabinetry for installation above or near any appliance, refer to the appliance manufacturer's specifications for clearance and venting requirements.

The cabinet Specifications catalog combines product information, illustrations and features all into one easy-to-use reference manual.

## How to Read a Cabinet Product Code

### Wall Cabinets

Wall cabinets are listed by item code, width and height. Thus the first number 24 is the width and the second number 30 is the height. The third number is the depth. The standard depth of a wall cabinet is 12" deep and therefore is not listed in the code.

### Base Cabinets

The standard height of a base cabinet is 34 1/2" and the depth 24". Base cabinets are listed by item code and width only, thus the 24 in this example is the width.

### Tall Cabinets

The tall cabinet width is always listed first and height is always the last two numbers. Thus 24" is the width and 90" is the height. Since most tall cabinets are 24" deep we only list the cabinet depth when it is not 24" as in the following example.

The depth of the cabinet is 18" and this number follows the the height 90 and the width is 24". When the depth is not 24" deep it will always be the last two numbers as in the following example.
